

In the Claims

The following is a complete listing of the claims that replaces all prior versions and listings of claims in this application.

1. (currently amended) A ~~Nursery~~ nursery care article, ~~in particular a feeding bottle or comforter,~~ comprising ~~a body,~~ a tip for suction ~~intended to penetrate and adapted to be~~ at least partially inserted within [in] an infant's mouth, ~~as well as~~ and a member surrounding said tip on which ~~the infant's~~ lips of the infant abut during suction, and

wherein [the] a hardness of [the] said member on which the lips abut is ~~clearly~~ greater than [the] a hardness of [the] said tip with the hardness of said tip being between 20 and 50 Shore A and the hardness of said member greater than 50 Shore A such that said member simulates a maternal areola.

2. (canceled)

3. (canceled)

4. (currently amended) The article of Claim 1, wherein ~~the member on which the lips abut and the tip are integral,~~ particularly in that they are made by bi-injection said tip and said member are integrally formed.

5. (currently amended) The article of Claim 1, wherein ~~it is question of a feeding bottle, the tip and the member on which the lips abut belonging to~~ said tip and said member are formed as a teat of this for a nursing bottle.

6. (currently amended) The article of Claim 1, wherein [the] ~~said member on which the lips abut~~ and [the] said tip are ~~mutually independent, at least~~ separately formed, said member is formed as an upper skirt of a principal part for securing said tip to a nursing bottle, said skirt having a first central opening there through thru which said tip is movable in translation along a principal axis of [this] said tip.

7. (currently amended) The article of Claim 6, wherein ~~it is question of a feeding bottle comprising~~ said tip includes a base flange, said principal part further includes a ring adapted to seal said base flange against an upper neck of the nursing bottle, ~~be connected on the body, the member on which the lips abut and~~ said skirt being integral with [this] said ring. ~~, while the tip belongs to a teat of this bottle, which is adapted to be removably fixed, by wedging, between opposite surfaces of the ring and the body.~~

8. (currently amended) The article of Claim 7, wherein ~~the member on which the lips abut defines, opposite the ring,~~ said ring includes an orifice for passage of an upper cylindrical portion of said [the] tip.

9. (currently amended) The article according to Claim [7] 8, wherein ~~the teat comprises said tip, a flange for wedging between the ring and the body, as well as~~ includes an integral [a] zone

for connection between ~~this tip and this~~ said base flange and
said upper cylindrical portion of said tip, [whose] said zone
having a shape that is adapted to facilitate the movement in
translation of [the] said tip, ~~along its principal axis, with~~
~~respect to the flange.~~

10. (currently amended) The article of Claim [6] 1, wherein
said tip and said member are components ~~it is question~~ of a
comforter, said comforter including a shield from which said tip
extends, and said [the] member on which the lips abut being
formed about said tip and against said shield ~~integral with the~~
~~body, while the tip is extended by a flange for fixation on the~~
~~body, an orifice for passage of the tip being made in the member~~
~~on which the lips abut.~~
